

BMBF - AgroClustEr:

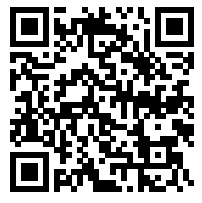

WeGa – Kompetenznetz Gartenbau

The WeGa - network is one of five expert networks from agricultural and nutritional science, which is funded by the Federal Ministry for Development and Research (BMBF) from 2010 to 2015 as part of the Hightech - Strategy.

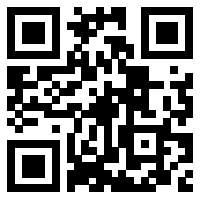

The aim of WeGa (Wertschöpfungskette Gartenbau – value chain horticulture) is to aid and protect sustainably the horticulture business sector using scientific expertise. With help from new crop varieties, the development and establishment of sustainable crop protection methods, research into causes of product defects and new quality control procedures the safety/quality of fruit, vegetables and ornamental plants is being increased. Additionally, relevant product safety questions are being addressed through the study of controlled vegetable production in the field and energy efficient ornamental plant production in greenhouses. The thematic focus of this joint research project is the product and production safety.
